[URBANAGE](#) and [Urbanite](#) projects together with the DG CNECT - Technologies for Smart Communities Unit of the European Commission are organising a virtual workshop: **Data-Driven Cities: Digital Technologies for Inclusive and Sustainable Decision-Making Processes** at the [European Week of Region and Cities 2022](#).

Don't delay it and [register today!](#)

Data-Driven Cities: Digital Technologies for Inclusive and Sustainable Decision-Making Processes

Digital Twins and AI can help by facilitating engagement around policy and service impact prediction. Planners and designers can make more collaboratively informed, evidence-based decisions. This workshop shares real examples of inclusive design practices and digital tools adopted by different cities eg. Santander, Flanders and Messina to help other cities implement their own digital twins and decision-making tools. They will explain how these practices relate to the EU “New Bauhaus initiative”.

The workshop will take place online on the **11th October 2022 at 4:30pm CET**. By joining this workshop you will have the opportunity to engage with experts including:

- Ms. Noirin Ni Earcain - EC Representative DG CNECT Technologies for Smart Communities Unit (Living.EU)
- Dr. Patricia Molina - Tecnalía
- Dr. Jurgen Silence – Region of Flanders
- Ms. Carlota Previti - Comune di Messina

We look forward to having you join us!
